SYSTEM 2000

Flexible Electronics Assembly Platform

System 2000 has been designed to provide the operator with an additional "pair of hands" while intricate assembly and testing is performed on electronic equipment. External tools are not required to join the separate pieces together to form a custom configuration designed to suit specific needs. The use of rotating hinged joints allows for any angular setting creating the flexibility needed to hold parts of all shapes and sizes. System 2000 offers a complete range of clamps, vices, and holders needed for electronic assembly operations, technical laboratories, and even the hobbyist. System 2000 is available in kits that come complete in plastic carrying cases. For other configurations please contact Ripley.
